

CLAIMS

What is claimed as invention is:

1. A method for creating, editing and updating, verifying, and  
5 referencing a database of work, educational, and licensing histories of workers, said method  
comprising the steps of:

providing an internet service with secure means for prospective  
employees to enter and record on a database a personal educational and job history covering any  
time period;

10 providing semi-automated means for verifying the history provided by  
the job applicant and for building a verified database of workers.

2. The method of claim 1 further including the step of:

providing a secure, confidential and private means for a prospective  
employer to review the verified educational, employment, criminal, and licensing history of the  
15 worker.
